# Tutorial Session 2

**Describing Data**

This week we will discuss Chapter 3 R code from Chapman and Feit's website. To begin, you should download Chapter 3 accompanying .R code file from the following link: http://r-marketing.r-forge.r-project.org/code.html

## 1 Part 1

The first part of this week's work can be found in the R markdown called "Tutorial 2- Part 1" which can be downloaded from blackboard.

## 2 Part 2

For the Second Part of this tutorial carefully run all the Chapter 3 accompanying .R code and answer the two following questions:

1. The boxplot part of the chapter 3 code, describes some information about P2. NOTE: P2 is Product 2.
   For a set of grocery stores selling milk over the counter, over a year, does this distribution look realistic to you? Discuss it in pairs and the share your opinions in the larger group.

2. Look at the map section using R object ISO2, what is the country code for India? Can you find the code for USA?

Recommendation: You can run the code creating your own r markdown document. A simple guide on R markdown here:
https://www.r-bloggers.com/2022/02/how-to-use-r-markdown-part-one/

For next week, read chapter 4.
